California Prop 65

Boltaflex and Nautolex Coated Fabrics with PreFixx

Subject:

Boltaflex with PreFixx and California Prop 65 Labeling

Summary:

OMNOVA Solutions manufactures a variety of Boltaflex and Nautolex patterns. Many of these Boltaflex and Nautolex patterns have been tested by a 3rd Party Lab and evaluated by a Toxicologist to determine the need to label our products with California Prop 65 labels.

Selected Boltaflex and Nautolex patterns require **No California Prop 65 labeling** based on the analysis and absence of exposure exceeding the safe harbor limits for those Prop 65 chemicals in the Coated Fabric formulations. This requirement solely covers the product as purchased and is not bound for any additional processing.

See Below for Product Pattern Listing.
